

Biography

K.H. Lux

Karl-Heinz Lux studied civil engineering at the University of Hannover and earned his Ph.D. with a thesis on tunnel construction in unconsolidated ground. His habilitation treatise addressed rock mechanics design and field experiences in salt cavern construction. Since 1986, he has taught geomechanics and waste disposal at the Technical University Clausthal, one of the oldest mining schools in Europe. Professor Lux is chairman of the German Salt Mechanics Working Group and a member of the German Waste Disposal Committee and the ad-hoc Asse Working Group. Dr. Lux presented at the first US/German Workshop on the topic of *Constitutive Modelling in Rock Salt Mechanics – From Past to Future – With Special Respect to Radioactive Waste*.
